AI Model Hardware & Pricing Reference

Model	GPU	VRAM	Cost ($/M in / out)	Official Site Name	Official Site
Llama 5 (Meta)	*Unverified — no Meta model card identified*	*Unverified*	*Unverified — release claims not corroborated by Meta or independent references*	Meta AI / Llama	https://www
Qwen 3.5 (397B-A17B)	*N/S — no official self-host GPU specification published*	*N/S — no official self-host VRAM specification published*	~$0.39–$0.60 in / $0.90–$3.60 out per M (third-party reported)	Alibaba Cloud Model Studio / Qwen	https://qwen
MiniMax M3	*N/S — no official self-host GPU specification published*	*N/S — no official self-host VRAM specification published*	$0.30 in / $1.20 out per M (≤512K context; list price $0.60 / $2.40)	MiniMax Open Platform	https://platfo paygo
GLM-5.2	*N/S — no official self-host GPU specification published*	*N/S — no official self-host VRAM specification published*	$1.40 in / $4.40 out per M (cached input $0.26)	Z.ai Developer Platform	https://docs.
Kimi K2.6 / K2.7 Code	*N/S — no official self-host GPU specification published*	*N/S — no official self-host VRAM specification published*	$0.95 in / $4.00 out per M (identical rate; cache-hit ~$0.16)	Moonshot AI / Kimi Open Platform	https://platfo
DeepSeek V4 Flash	*N/S — no official self-host GPU specification published*	*N/S — no official self-host VRAM specification published*	$0.14 in / $0.28 out per M (cache-hit $0.0028)	DeepSeek API Docs	https://api-docs.deepsee
DeepSeek V4 Pro	*N/S — no official self-host GPU specification published*	*N/S — no official self-host VRAM specification published*	$0.435 in / $0.87 out per M (cache-hit $0.003625)	DeepSeek API Docs	https://api-docs.deepsee
NVIDIA Nemotron 3 Ultra	4× GB200, 4× B200, 4× GB300, 4× B300, or 8× H100 (official minimum)	~330 GB (NVFP4) to ~1.1–1.7 TB (BF16), per official NIM documentation	No official per-token price — open-weight / self-host model, distributed via NIM	NVIDIA API Catalog / NIM Docs	https://docs. nemotron-3-

Estimated Values — Hugging Face / Community Sources

Model	GPU	VRAM	Cost ($/M in / out)	Official Site Name	Official S
Llama 5 (Meta)	*No trustworthy estimate found*	*No trustworthy estimate found*	*No trustworthy estimate found*	—	—
Qwen 3.5 (397B-A17B)	4× or 8× H100 80GB, or 8× B200	~794 GB (FP16) / ~397 GB (FP8)	$0.39 in / $0.90 out per M	Spheron Network (GPU Deployment Guide)	https://w qwen-3-5
MiniMax M3	2× RTX PRO 6000 (community minimum) up to multi-GPU cluster for full precision	~855 GB (BF16 full) / ~159 GB (community IQ3_XXS quant)	$0.24 in / $0.96 out per M	Hugging Face (unsloth/MiniMax-M3-GGUF)	https://hu GGUF
GLM-5.2	8× H200-class cluster (production estimate)	~1,568–1,600 GB (BF16/FP16) / ~476 GB (Q4_K_M)	$0.67 in / $2.10 out per M	OpenRouter (GLM-5.2 model page)	https://op

Model	GPU	VRAM	Cost ($/M in / out)	Official Site Name	Official S
Kimi K2.6 / K2.7 Code	8× H200 (Q8 production) / 8× H100 (Q4_K_M minimum)	~620–630 GB (Q4_K_M/INT4) / ~2 TB (FP16)	K2.6: $0.60 in / $3.41 out — K2.7 Code: $0.71 in / $3.50 out per M	OpenRouter (Kimi K2.6 / K2.7 Code)	https://op
DeepSeek V4 Flash	2× H200, or 4× RTX Pro 6000 / A100 80GB	~158–175 GB (FP4+FP8 weights + KV cache)	$0.09 in / $0.18 out per M	OpenRouter (DeepSeek V4 Flash)	https://op flash
DeepSeek V4 Pro	8× A100/H200 minimum; realistically 12–16× H200 multi-node	~862 GB – 1 TB+	~$1.74 in / $3.48 out per M	Lushbinary (Self-Hosting DeepSeek V4 Guide)	https://lu hosting-g
NVIDIA Nemotron 3 Ultra	8× H100 (community-confirmed minimum, BF16)	~1.1–1.7 TB (BF16); ~330 GB (NVFP4 profile)	$0.37 in / $1.08 out per M	Hugging Face (nvidia/Nemotron-3-Ultra-550B-A55B-Base)	https://w nemotron
